

AVEPOINT CITIZEN CONNECT PLATFORM

AvePoint's Citizen Connect Platform provides governments with a unified system to actively engage their constituents, drive transparency, as well as efficiently and accurately communicate citizen service requests with departments – from any device, anywhere, at any time.

CONNECT WITH YOUR CITIZENS AT THE SPEED OF NOW

Using Microsoft technologies – such as Office 365, Azure, BizTalk, Dynamics, Lync, Project, Windows 10, and Yammer – AvePoint Citizen Connect is a suite of integrated solutions that allows government agencies and non-government organizations (NGOs) to modernize their operations today, in order to better plan for tomorrow.

MODERN CITIES. ENGAGED CITIZENS. IMPROVED SERVICES.

POWERED BY:   

AVEPOINT CITIZEN SERVICES

- Provide your community with a centralized portal to easily submit citizen service requests from anywhere, anytime, on any device.
- Utilize integrated geo-location services and mappings from mobile devices to accurately respond to citizen requests according to their location and optimize task allocation from nearby field staff.
- Help cities modernize government administration by eliminating manual case management processes that drain valuable time and are susceptible to human error.
- Pinpoint system inefficiencies and weaknesses to optimize operations, and enable searching, tracking, and reporting for greater insight.

Microsoft Azure  

AVEPOINT TOWNHALL

- Gain insight into constituent sentiment by monitoring social network activity and citizen portals.
- Review sentiment trends over time to better understand approval ratings, key concerns, areas of improvement, and more.
- Broaden reach and overcome traditional barriers such as time and location by hosting online meetings in conjunction with in-person town hall events.
- Deepen engagement and give constituents a voice by conducting real-time polls and surveys to quickly address questions or issues as they arise.
- Track meeting actions and decisions, as well as record online meetings so citizens unable to attend live can view afterward to stay informed.

AVEPOINT PROJECT TRANSPARENCY

- Using familiar Microsoft technologies, centralize the management of all ongoing public projects into a unified, easy-to-use system, driving adoption and reducing inefficiencies caused by data silos.
- Facilitate awareness of public project information and current agency trends to your core stakeholders – your project team, your executives, and your constituents.
- Easily report and disseminate project data as actionable information surfaces from day one via reports and dashboards.
- Provide public rollup reports and executive dashboards in real time for insight into trends for project activities, schedules, key performance indicators (KPIs), status levels, and more.
- Optimize resource management by increasing project visibility across departments and stakeholders with precise, normalized data and actionable reporting.

AVEPOINT MOBILE WORKFORCE

- Empower your field staff with instant access to information, resources, and assistance wherever they are.
- Maximize mobile field staff efficiency and improve response times with location-based task assignments and request mappings.
- Enable continuous productivity with real-time updates on assignments and case information with rich-media annotations, as well as live mobile assistance.
- Optimize processes and resources by gaining keen insight on individual and team performance through rich management dashboards and analytics.
