

OFFICE 365 ARCHIVING

WITH AVEPOINT CLOUD ARCHIVING

Manage. Redefining cloud-based data archiving best practices.

KEY BENEFITS

 <p>INTELLIGENT OFFICE 365 ARCHIVING</p>	 <p>RECOVER ANYTHING, ANYTIME, ANYWHERE</p>	 <p>RESPONSIBLE AND COMPLETE AUDIT RECORDS</p>
<p>Intelligently apply lifecycle management policies by archiving and removing dormant Office 365 files, sites, and more based on fully customizable business rules and filters.</p> <p>Flexible retention plans allow your organization to easily meet industry regulations by automatically moving content out of Office 365 and into a secure location of your choice for future retention, recovery, or responsible and secure disposal.</p>	<p>Restore archived content any time you want to SharePoint Online, Office 365 Groups files, and OneDrive for Business with full fidelity and granular capabilities.</p>	<p>Enable consistent, automatic disposition of Office 365 records in accordance with established policies by maintaining immutable, read-only copies of archived content.</p> <p>Ensure compliance with records and information management policies with a comprehensive audit trail of content that has been archived, declared a record, moved, or deleted.</p>

OPTIMIZE DATA STORAGE IN OFFICE 365

From records management to information compliance, **AvePoint Cloud Archiving** helps organizations take full control of stale or unused data assets stored in the cloud in an intelligent and responsible manner. With **AvePoint Cloud Archiving**, organizations are enabled to archive and remove unused or inactive Office 365 content to lower-cost storage tiers with metadata, workflow state, and permissions fully maintained. By offering granular restoration to SharePoint Online, Office 365 Groups files, and OneDrive for Business, as well as comprehensive monitoring and auditing, **AvePoint Cloud Archiving** ensures organizations' data is always safe, easy to access, and compliant with government and industry regulations.

AvePoint Cloud Archiving is a Software-as-a-Service (SaaS) offering by AvePoint, hosted on Infrastructure-as-a-Service (IaaS) offerings by Microsoft Azure.

TECHNICAL OVERVIEW

INTELLIGENT ARCHIVING

- **Granular Archiving** – Archive stale content from SharePoint Online, Office 365 Groups files, and OneDrive for Business – including site collections, sites, lists, libraries, apps, items, document versions, and attachments – with metadata, workflow state, and permissions fully maintained.
- **Records Management** – Identify and declare records, including the ability to remove or maintain a read-only copy of content, in SharePoint Online, Office 365 Groups files, and OneDrive for Business .
- **Content Filtering** – Archive content based on built-in or customizable properties – including content type, owner, last modified date and time, last access time, file size, parent list type ID, parent folder name, or custom metadata fields.
- **Online Storage** – Store archived content in any cloud storage drive – including Microsoft Azure, Amazon S3, Rackspace, IBM Tivoli Storage Manager (TSM), NetApp AltaVault, Box, and Dropbox, as well as Secure File Transfer Protocol (SFTP) or File Transfer Protocol (FTP) enabled locations – for hierarchical storage management and enhanced storage optimization.
- **Retention Policies** – Apply retention policies to preserve or remediate content in compliance with information management policies or to move stale content to less expensive storage tiers.

GRANULAR RESTORE

- **Archiver Restore** – Granularly restore archived content back to SharePoint Online, Office 365 Groups files, and OneDrive for Business .
