UNDERSTAND USAGE AND ADOPTION WITH OUR POWERFUL OFFICE 365 REPORTING TOOL.

Office 365 holds a wealth of user activity, content, and data, but to make strategic business decisions, you need more than reports and activity logs. By rendering easy-to-use dashboards with Microsoft Power BI, AvePoint Cloud Insights provides Office 365 administrators and content owners with the intelligence they need to make more informed resource allocation and data management decisions. Report on sites and site collections to determine who your top content authors are, who is using your content, and how often people are visiting your sites.

AvePoint Cloud Insights is a 100 percent Azure-based Software-as-a-Service (SaaS) offering for Office 365.

TECHNICAL OVERVIEW

OFFICE 365 CONTENT REPORTING

- Rank documents in a single SharePoint Online site from most to least active by tracking activities such as access to, check in, check out, modify, download, upload, and delete
- Report on the top ten documents with the most user activity in each site or site collection in your SharePoint Online instance
- Learn the type of content utilized most by analyzing user activity by file types such as .aspx, .pdf, .xlsx, .csv, .jpg, .zip, or .docx

OFFICE 365 USER REPORTING

- Discover the top ten users, departments, and offices that are most active in SharePoint Online – sort by access times and activities such as download, view, edit, or upload
- Graphically display the number and percentage of consumers, contributors, and authors across your organization's user base, departments, and offices

OFFICE 365 STORAGE REPORTING

- Generate reports showing the current usage and size of individual sites and site collections
- Track growth in storage over time for individual sites and site collections
- Gain insight into consumed and available storage for individual sites or across your overall deployment

OFFICE 365 SITES ANALYTICS

- Gain insight into page popularity by ranking sites across SharePoint Online according to the total number of unique visits for each page
- Track and graphically display page view trends for an individual site or across your overall deployment
- Understand user behavior on individual sites and site collections with reports on recently visited sites/site collections, last access time, and the number of unique users
- Display the top ten pages where users spend the longest amount of time
