

FILE SHARE NAVIGATOR ONLINE

FOR MICROSOFT OFFICE 365

KEY BENEFITS

CONTENT INTEGRATION

Consolidate enterprise-wide access to all content by exposing in SharePoint Online large files and rich media that are natively unsupported.

MIGRATION-FREE ACCESS

Avoid resource-intensive migration projects, leaving content in existing file shares but accessing those files with full SharePoint Online functionality.

GLOBAL ACCESS

Ensure global content access by allowing remote users to access content stored in file shares through SharePoint Online without a VPN connection.

EFFICIENT SEARCH

Increase discoverability by utilizing SharePoint Online's full metadata-based search across all enterprise content.

IMPROVED ADOPTION

Accelerate collaboration and user adoption by offering a familiar user experience for all enterprise content within a single point of access.

A SINGLE POINT OF ACCESS FOR ENTERPRISE COLLABORATION

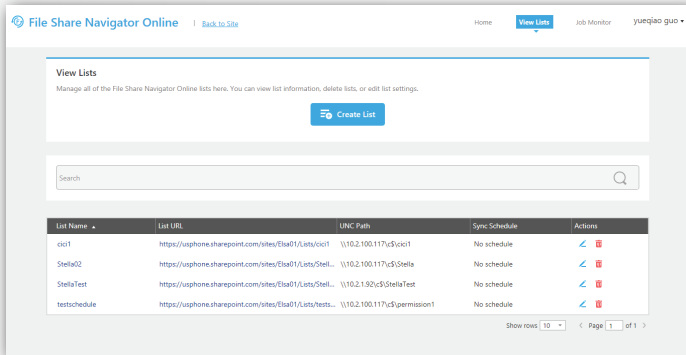

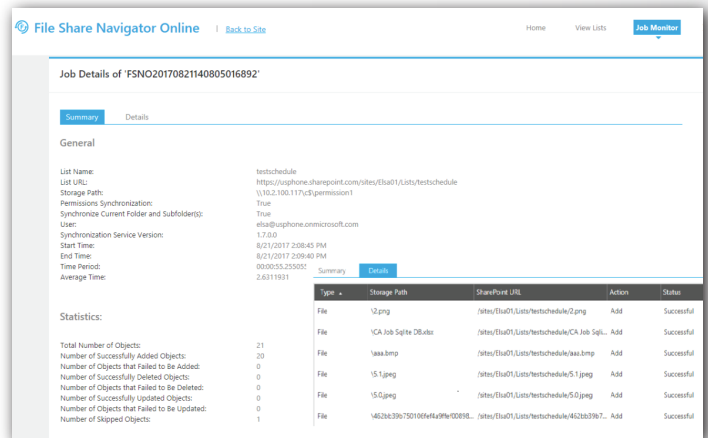

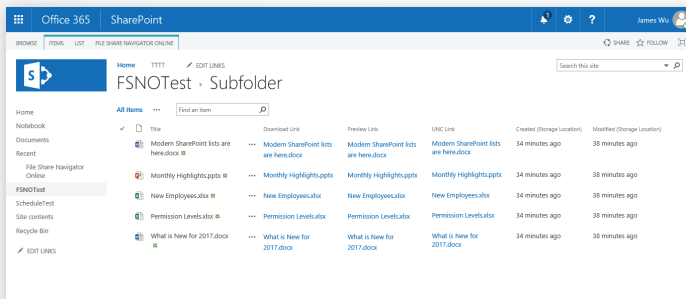

AvePoint File Share Navigator Online removes the barriers to seamless global collaboration by consolidating enterprise-wide access to all content via SharePoint Online. Without resource-intensive migration projects, expose a variety of natively unsupported file share content – such as large files, rich media, and other file types – in SharePoint Online lists for end users to access, view, and download.

TECHNICAL OVERVIEW

- Connect files stored in net shares with SharePoint Online and expose as items in File Share Navigator Online lists, allowing end users to access, view, and download file-based content through SharePoint Online without migration
- Automatically add metatags to specified files during the synchronization from net shares to SharePoint Online with a customizable CSV file
- Enable end users to browse, view, and download all enterprise content through SharePoint Online – including files larger than SharePoint native limits, Microsoft Access data, .exe and .bat files, and Excel Share books
- Utilize SharePoint Online’s full metadata-based search and document uploading/downloading directly from within SharePoint Online without a VPN connection, allowing for seamless collaboration and increased adoption
- Easy online registration and lightweight installation on the AvePoint Online Services central administration console, requiring neither additional infrastructure nor Microsoft External BLOB Storage (EBS) and Remote BLOB Storage (RBS) API configurations. Easy deployment as an app added into your SharePoint Online site
- Centralized interface for users to view and manage all the connected File Share Navigator Online lists within their allowed permissions, displaying configuration details such as list name, list URL, source UNC path and sync schedule
- Monitor all sync jobs by viewing details – including list URL, net share path, the user who triggers the sync job, job status, job time, number of successfully/failed synchronized or deleted files, and file locations on both net share and SharePoint Online – in Job Monitor
- Edit shared files from your file server directly within Office Online to avoid creating local or duplicate copies of content

Seamlessly access, download, upload, and view large files, rich media, and file share content in SharePoint Online.
