

AVEPOINT ONLINE SERVICES

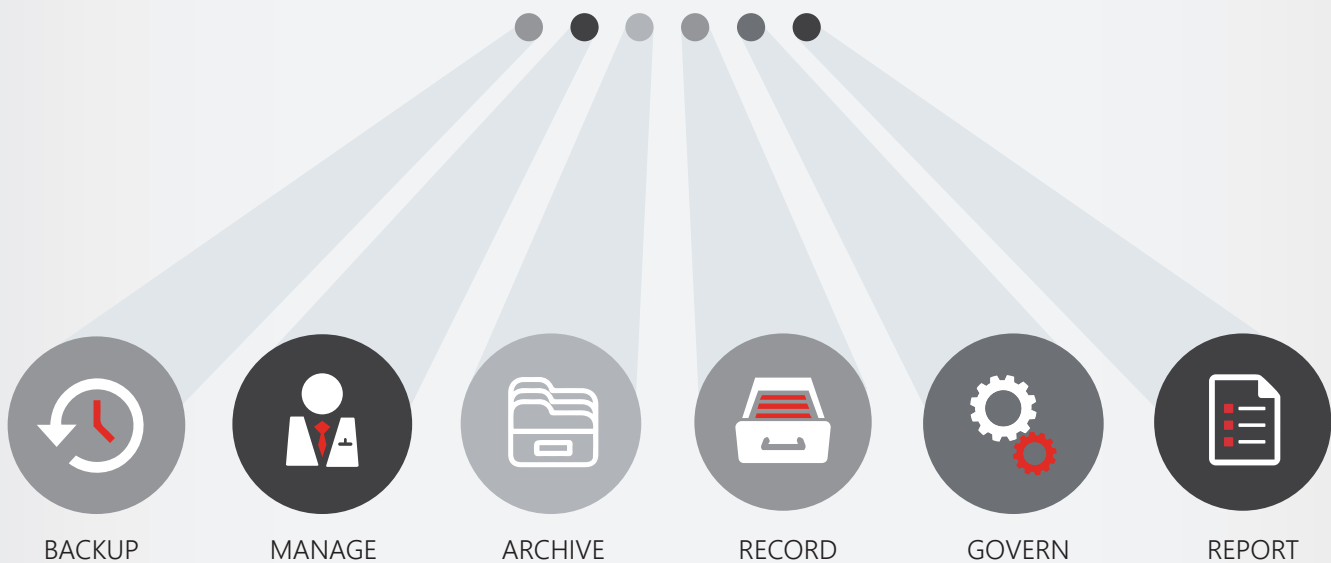

FOR MICROSOFT OFFICE 365

Microsoft Office 365 gives users flexibility to create and share information from anywhere, at any time, and on any device. While this promotes collaboration and rapid adoption, a lack of information architecture can lead to operational inefficiencies and increased risks in data security and privacy. Organizations must find ways to reduce time spent searching for enterprise-wide content, mitigate incorrect or unauthorized changes in permissions, and closely monitor the sharing of sensitive content.

AvePoint® Online Services

FOR MICROSOFT OFFICE 365

Serving 5 million global users, AvePoint Online Services is the industry's first and only 100 percent Microsoft Azure-based Software-as-a-Service (SaaS) platform for Office 365. Requiring no installation or agents, AvePoint Online Services provides a central home for your business users, decisionmakers, and IT administrators to seamlessly access resources and extend cloud computing as their needs dictate.

CLOUD BACKUP FOR OFFICE 365 ADMINISTRATORS

Automate. Protect. Restore.

- Automated backup (up to 4X daily) with flexible capacity options ensures all sites, drives, mailboxes, Public Folders, projects, groups, and teams are protected
- Store your backup data in our scalable Microsoft Azure Storage, or in your cloud of choice
- On-demand roll-back of entire sites or granular objects—including libraries, mailboxes, or security settings
- Quickly identify content for restore with search, based on built-in or customizable properties
- Restore content fast to its original location, online sites, drives, mailboxes, or offline file systems

CLOUD MANAGEMENT FOR OFFICE 365 ADMINISTRATORS

Administer. Migrate. Replicate. Report.

- Enhance Office 365 management with automated control over security, configurations, and content
- Accommodate enterprise scaling by easily reorganizing content, configurations, and site elements, as well as replicating changes globally with real-time synchronization
- Gain valuable insights with customizable reports—to better understand your SharePoint Online, Office 365 Groups, and OneDrive for Business environments—including architecture and security settings

CLOUD ARCHIVING FOR OFFICE 365 ADMINISTRATORS

Identify. Archive. Store.

- Archive and remove out-of-date content from Groups, SharePoint Online, and OneDrive to optimize storage
- Identify content for removal with flexible filters based on built-in properties or customized metadata
- Remove and delete Office 365 data, or store it for long-term retention in any cloud storage drive
- Retain data according to information management policies, and restore with on-demand search

CLOUD RECORDS FOR RECORDS MANAGERS

Classify. Retain. Dispose.

- Take control of your Microsoft Office 365 content and physical records
- Create and manage classification schemes to drive your content lifecycle
- Create flexible retention and disposal rules based on multiple criteria to properly reflect your business requirements
- Report on information outcomes, user activity, and classification changes to interrogate policy enforcement

DOCAVE GOVERNANCE AUTOMATION ONLINE FOR BUSINESS & POWER USERS

Provision. Manage Lifecycle. Recertify.

- Deliver SharePoint Online and Office 365 Groups as a managed service by allowing end users to request resources for provisioning, permissions, as well as lifecycle and content management, through a role-based, business-centric service catalog
- Enforce organizational policies for retention, expiration, classification, and recertification for your SharePoint Online sites and Office 365 Groups
- Enable end users to request Office 365 resources on-the-go with the DocAve Governance Automation Online App

CLOUD INSIGHTS FOR OFFICE 365 ADMINISTRATORS & SITE OWNERS

Track. Report. Analyze.

- Understand where, how often, and what type of content is most active per site or across your deployment by tracking download, upload, edit, view, delete, and access events
- Allow site owners or Office 365 administrators to observe trends in content growth relative to quotas and other sites to better balance site usage
- Discover who your top content consumers, contributors, and authors are to better understand Office 365 adoption rate and patterns
- Understand how users are accessing SharePoint Online and where they're visiting by tracking the source and flow of traffic across all sites and site collections
