AvePoint® Timeline Pro for Microsoft® Dynamics CRM

Key Features

- **Timeline View** – Interactive display of all relevant activities and all milestones for CRM accounts and records on a timeline.
- **Detail View** – Displays all record details by drilling down into the graphical timeline, such as last recorded interaction and contact information.
- **Management View** – Allows managers to view the timelines for their individual team members.
- **Personal View** – Grants end users the permission to create their personal views with customizable criteria for easier browsing.
- **Task Management** – Provides a centralized view for users to view all their activities across different records.
- **Annotate** – Flags records (e.g. Activities) as important and provides capability to add notes or comments as well as custom activities to records. Sync annotations back to Dynamics CRM to always access up-to-date record information from anywhere.
- **Update** – Change activity status directly in Timeline to log the latest progress.
- **Launch** – Quickly launches a record in Dynamics CRM directly from Timeline Pro, or launch Timeline Pro from a Dynamics CRM record.
- **Search** – Configurable search for records to view within timelines.
- **Configurable User Experience** – Tailor the data presented in Timeline Pro to meet various organizational roles to support overall customer interaction in addition to account management.

Display relevant information in an integrated interface to meet various business user requirements.
