

DOCAVE SOFTWARE

FOR MICROSOFT® SHAREPOINT® INFRASTRUCTURE MANAGEMENT

Introducing the Enterprise-Class Infrastructure Management Platform for Microsoft SharePoint

As a fully integrated platform, DocAve Software:

- Simplifies the deployment, monitoring, and enforcement of Microsoft SharePoint Server and SharePoint Online infrastructure management and governance policies
- Enables centralized or delegated management of SharePoint farms hosted on premises, or in private and public clouds such as Microsoft Office 365 and Microsoft Azure
- Enhances business continuity with intelligent item-through-platform-level data protection, simplified restoration of all SharePoint assets – including externalized content, customizations, and SharePoint server VMs – and a one-switch highly available, failover orchestrator
- Manages development, test, and production farms with ease
- Governs solution and component deployment with application lifecycle management tools

KEY BENEFITS

1

INCREASE BUSINESS PRODUCTIVITY

Deliver high-performance, global collaboration.

- Enable seamless global SharePoint service
- Empower business users while enforcing policies and standards
- Optimize content availability
- Improve quality of service
- Consolidate document access to a single user experience
- Automate repetitive and time-consuming processes involved in provisioning, configuring, managing, and enforcing SharePoint governance policies

2

REDUCE TOTAL COST OF OWNERSHIP

Increase operational efficiency.

- Utilize cloud offerings and eliminate infrastructure and storage costs
- Improve ongoing realignment of cost allocation by analyzing business usage and rate of adoption
- Provide insight into operations, performance, and usage
- Integrate and support leading SharePoint hardware and software solutions
- Consolidate and integrate legacy content management systems

3

PROVIDE IT ASSURANCE

Improve quality of service & minimize business disruption.

- Meet requirements for long-term content and information management
- Protect business content – whether it's hosted on premises, in the cloud, or through a hybrid deployment – with support for enterprise-caliber Service Level Agreements (SLAs)
- Architect a highly available service that is resilient in the face of disaster
- Protect content and configurations of leading third-party SharePoint applications and services

4

ENABLE SECURITY & COMPLIANCE FOR BUSINESS CONTENT

Standardize and enforce corporate IT policies.

- Provision user permissions to content
- Comply with information governance and records management policies by applying retention policies to content
- Implement sophisticated auditing policies
- Archive content to tiered storage
- Respond to legal eDiscovery requests with speed and precision

DOCAVE CAPABILITIES

MIGRATION

Seamlessly migrate enterprise content from legacy systems or previous SharePoint versions into SharePoint Server 2016, SharePoint Server 2013, SharePoint Server 2010, or SharePoint Online with full fidelity for swift reorganization and streamlined content propagation.

- [Migrators](#)
 - [Documentum eRoom Migrator](#)
 - [EMC Documentum Migrator](#)
 - [Exchange Public Folder Migrator](#)
 - [File System Migrator](#)
 - [Livelihood Migrator](#)
 - [Lotus Notes Migrator](#)
 - [Oracle/Stellent Migrator](#)
 - [Quickr Migrator](#)
 - [SharePoint Migrator](#)
 - [Vignette Migrator](#)
 - [Website Migrator*](#)
 - [Office 365 High Speed Migration](#)

INTEGRATION

Integrate SharePoint environments with existing network or cloud file-based content, or other SharePoint farms, to consolidate access to enterprise-wide digital assets without migration.

- [Connector](#)
- [Cloud Connect](#)
- [Replicator](#)
- [File Share Navigator*](#)

MANAGEMENT

Streamline the implementation and enforcement of access, provisioning, and lifecycle management policies with complete, unified management and control over SharePoint content, customizations, users, security, and sites.

- [Administrator](#)
- [Content Manager](#)
- [Deployment Manager](#)
- [Replicator](#)
- [Report Center](#)
- [Governance Automation*](#)
- [DocAve Online*](#)

OPTIMIZATION

Deliver high-performance global collaboration while lowering SharePoint total cost of ownership (TCO) with efficient Microsoft SQL Server® storage and content lifecycle management.

- [Archiver](#)
- [Connector](#)
- [Report Center](#)
- [Storage Manager](#)
- [File Share Navigator*](#)
- [Governance Automation*](#)

PROTECTION

Protect all critical SharePoint assets from network failure, non-compliant content, and accidental deletion to ensure continuous SharePoint platform availability.

- [Archiver](#)
- [Backup and Restore](#)
- [High Availability](#)
- [SQL Server Data Manager](#)
- [Vault](#)
- [VM Backup and Restore](#)
- [Governance Automation*](#)
- [DocAve Online*](#)

REPORTING

Gain single pane access to a wide variety of mission-critical content, data, and trending statistics to generate customizable reports and alerts based on growth, performance, usage, or legal eDiscovery requests for proactive decision making.

- [DocAve eDiscovery](#)
- [Report Center](#)
- [Governance Automation*](#)
