

DOCAVE FILE SYSTEM MIGRATOR

FOR MICROSOFT® SHAREPOINT® MIGRATION

Migrate. Quickly consolidate enterprise content from Windows-based file systems into Microsoft SharePoint Server and SharePoint Online.

KEY BENEFITS

 <p>EFFECTIVE MIGRATION</p>	 <p>BUSINESS CONTINUITY</p>	 <p>FLEXIBLE MIGRATION AND SCHEDULING</p>	 <p>HIGH SPEED MIGRATION TO OFFICE 365</p>
<p>Reduce content sprawl and improve worker productivity by centralizing assets into on-premises, hybrid, or Office 365-hosted SharePoint repositories with full fidelity.</p>	<p>Clean up and reorganize file system content quickly and efficiently using customizable content and file-size filters, resulting in a clutter-free and compliant SharePoint repository aligned with business needs.</p>	<p>Allow administrators to plan migration jobs according to business needs and timetables with granular or bulk content migration and job scheduling.</p>	<p>Migrate large quantities of content from file systems to Office 365 quickly and easily, while ensuring full fidelity around your content.</p>

MIGRATION TO SHAREPOINT MADE EASY

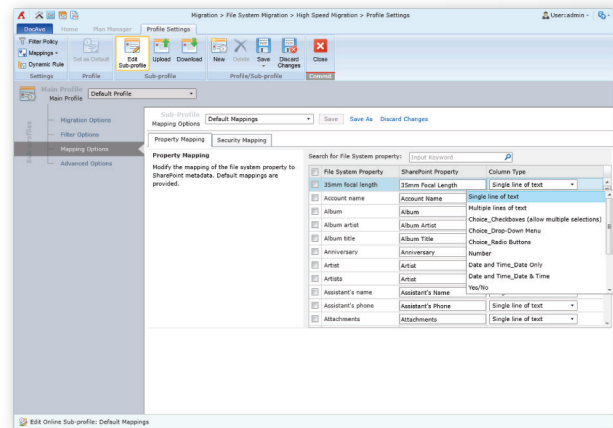

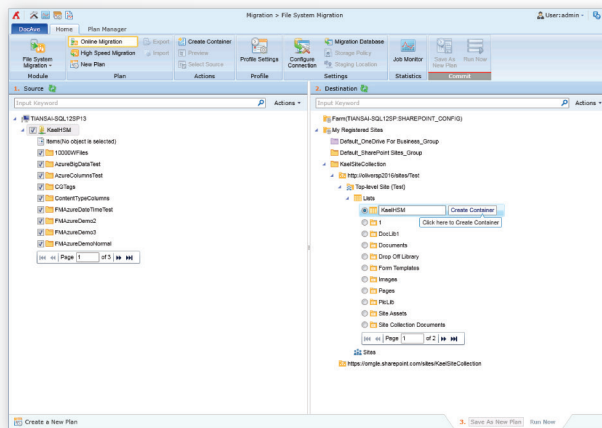

DocAve File System Migrator efficiently migrates documents from traditional Windows-based file systems or networked file shares to SharePoint Server 2016, SharePoint Server 2013, and Office 365 – SharePoint Online. IT administrators can easily automate the process of consolidating the full spectrum of corporate-wide document sources onto SharePoint, thereby maximizing the return on investment in existing content residing in local and shared file systems. And with High Speed Migration for Office 365, you can transition into Office 365 quickly and securely, making cloud-based productivity a reality.

TECHNICAL OVERVIEW

- Delegate migration plan management based on administrative roles
- Scan source content prior to migration to identify the scope of migration, and detect any illegal characters, user permissions, user names, user domains, as well as other file system elements that must be mapped in order to migrate successfully into SharePoint or SharePoint Online
- Selectively migrate content – including files, folders, shared folders and disks – according to business needs with granular content selection as well as customizable filtering options based on content properties, and perform test runs to validate migration plan configurations
- Automatically compress and migrate files that are natively blocked by SharePoint 2016 or SharePoint Online
- Migrate Binary Large Objects (BLOBs) to external storage devices, leaving corresponding stubs in SharePoint to improve migration efficiency as well as save Microsoft SQL Server storage space
- Perform full and subsequent incremental migrations to keep network bandwidth resources optimized, only migrating content that has been updated since the last migration
- Bring your own Azure storage, or let DocAve automate the creation, encryption, and disposition of temporary Azure storage required for High Speed Migration at no extra cost
- Automate construction of your new SharePoint environment on-the-fly during your migration
- Preserve all metadata – including security settings, attributes, and properties – with full fidelity, utilizing customizable mappings to properly represent legacy elements and quickly take advantage of SharePoint’s features such as Managed Metadata
- Create dynamic rules based on out-of-the-box interfaces to customize mappings and filter policies in order to meet specific business needs – including the ability to create new Managed Metadata, merge/split columns, and replace column values in the destination
- Migrate online over existing networks, or offline to securely migrate data across firewalls
- Keep source and destination environments in sync with customizable scheduling to minimize business disruption during the course of the migration project

Point-and-click migration simplifies the transfer of content into SharePoint.
