

Use customizable reports and alerts to gain a comprehensive understanding of Microsoft SharePoint Server 2019, SharePoint Server 2016, SharePoint Server 2013, SharePoint Server 2010, and SharePoint Online performance, security, topology, and usage.

Microsoft® SharePoint® Reporting with DocAve Report Center

Granular & On-Demand Reporting

Track, record, and report on every aspect of your SharePoint Server and SharePoint Online architecture and activity in real time or on a scheduled basis.

Maximize Return on Investment

Ensure SharePoint best practices and guidelines are met by monitoring the current state of your environment and alerting administrators when recommended activity, storage, or network usage thresholds are exceeded.

Streamline Operations

Streamline operations by reporting and producing actionable reports on SharePoint sites, users, content, storage, and social activity.

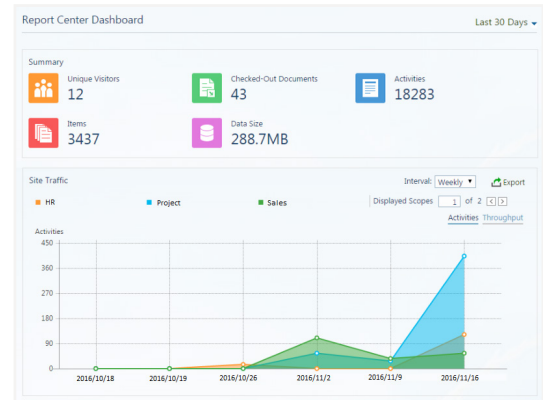

Compliance & Governance

Gain vital compliance intelligence based on enterprise governance policies by monitoring access to, and usage of, SharePoint and its content.

One Dashboard: Comprehensive Platform Intelligence & Actionable Reporting

DocAve Report Center is the industry's most powerful and flexible intelligence toolkit for SharePoint on premises, cloud, and hybrid deployments. By providing single-pane access to a wide variety of mission-critical analytics, administrators can gain a comprehensive understanding of their platform's topology, usage, and performance trends, while surfacing content- or user-centric reports for business owners. DocAve's configurable alerts and notifications, based on customizable threshold triggers, enable administrators and business owners to make proactive, intelligent management decisions.

| Rule Profile Name | Rule Type | Rule Details | User | Scanned Time | Activity Details | Action |
|--------------------------------------|-----------------------------------|--|----------------|------------------|---|--------------------------------|
| 36.39 subsite.offlineuser.permission | Download and Upload | Download Times >= 1 times within 30 minutes | System Account | 2014-12-30 17:16 | Download 40 Items within 2014-12-30 | Export Details |
| 36.39 subsite.offlineuser.permission | Download and Upload | Download Items >= 1 within 30 minutes | System Account | 2014-12-30 17:16 | Download 36 Items within 2014-12-30 | Export Details |
| 36.39 subsite.offlineuser.permission | Download and Upload | Download Size >= 1 MB within 30 minutes | System Account | 2014-12-30 17:16 | Download 31.03MB within 2014-12-30 | Export Details |
| 36.39 subsite.offlineuser.permission | Download and Upload | Download Times >= 1 times within 30 minutes | System Account | 2014-12-30 17:11 | Download 4 Items within 2014-12-30 | Export Details |
| 36.39 subsite.offlineuser.permission | Download and Upload | Download Items >= 1 within 30 minutes | System Account | 2014-12-30 17:11 | Download 2 Items within 2014-12-30 | Export Details |
| 36.39 subsite.offlineuser.permission | Objects Affected by Audit Events | Change Permissions for >= 1 List within 30 minutes | Emily | 2014-12-30 17:06 | Permissions changed for 1 List within 2 | Export Details |
| 36.39 subsite.offlineuser.permission | Objects Affected by Audit Events | Change Inheritance Settings for >= 1 List within 30 min | Jack | 2014-12-30 17:06 | Inheritance changed for 1 List within 2 | Export Details |
| 36.39 subsite.offlineuser.permission | Activity Measured by Audit Events | Change Permissions for List\Document\List Item\Folder\ | Jack | 2014-12-30 17:06 | Permissions changed for List\Document | Export Details |
| 36.39 subsite.offlineuser.permission | Activity Measured by Audit Events | Change Inheritance Settings for List\Document\List Item\ | Jack | 2014-12-30 17:06 | Inheritance changed for List\Document | Export Details |
| 36.39 subsite.offlineuser.permission | Download and Upload | Download Times >= 1 times within 30 minutes | Leo | 2014-12-30 17:01 | Download 5 Items within 2014-12-30 | Export Details |

| 36.39 subsite.offlineuser.permission | Objects Affected by Audit Events | Change Permissions for >= 1 Site within 30 minutes | Emily | 2014-12-30 17:01 | Permissions changed for 1 Site within 2 | Export Details |

Monitor and report on user activities within a given time frame. Provide a slick reporting dashboard that allows site owners and end users to view SharePoint content information and activities on the SharePoint interface.

- Run real-time or scheduled reports to track SharePoint usage, performance, growth, and health
- Track, graphically display, and export reports on SharePoint and Microsoft 365 usage, user activity, and vital analytics – including most frequently accessed content, last access time, active users, searched terms, checked-out documents, download ranking, site activity ranking, site visitors, site activities, failed login attempts, workflow status, and page traffic
- Monitor SharePoint service status, network bandwidth usage, CPU and memory consumption, SharePoint topology, site collection comparison and load time – all from a single, customizable interface – and trend this data over time to discern optimal maintenance schedules
- Track trends and growth patterns in storage consumption, SharePoint content databases, web applications, site collections, and SharePoint Online sites across entire environments or per user
- Configure customizable alerts based on site or content load times, disk space capacity, and CPU usage to proactively address potential performance issues or non-compliant activity in real-time
- Analyze business usage and social activity with holistic auditing to gain insight into the most active and popular contributors, top documents, blog posts, discussions, and wiki pages
- Gain insight into global SharePoint settings, security, metadata, and content type usage, including real-time difference reports to monitor governance policy compliance
- Check the configuration settings for various objects, from farms to lists, in your SharePoint Server and SharePoint Online environments by granularly selecting specific settings and statistics at different levels to display in a detailed report
- Monitor heavily regulated content and user activities by tracking the item or user through its entire lifecycle, including site or list access as well as permission or content type changes
- Audit all user activities in SharePoint Online, Exchange Online, and Azure Active Directory (AD) through integration with Microsoft 365 Activity Management API
- Display the suspicious user activities, including view, delete, restore, update, search, check in/out, and change settings and permissions, that took place in a given time frame
- Provide an end-user report dashboard allowing site owners and end users to view content usage, user activities, storage analytics, site usage, and activities directly from the SharePoint interface
- Audit all DocAve management actions to monitor administrators for policy compliance
