

DOCAVE REPORT CENTER

FOR MICROSOFT® SHAREPOINT® REPORTING

Manage. Use customizable reports and alerts to gain a comprehensive understanding of Microsoft SharePoint Server 2016, SharePoint Server 2013, SharePoint Server 2010, and SharePoint Online performance, security, topology, and usage.

KEY BENEFITS

 <p>GRANULAR & ON-DEMAND REPORTING</p>	 <p>MAXIMIZE RETURN ON INVESTMENT</p>	 <p>STREAMLINE OPERATIONS</p>	 <p>COMPLIANCE & GOVERNANCE</p>
<p>Track, record, and report upon every aspect of your SharePoint Server and SharePoint Online architecture and activity in real-time or on a scheduled basis.</p>	<p>Ensure SharePoint best practices and guidelines are met by monitoring the current state of your environment and alerting administrators when recommended activity, storage, or network usage thresholds are exceeded.</p>	<p>Streamline operations by reporting and producing actionable reports on SharePoint sites, users, content, storage, and social activity.</p>	<p>Gain vital compliance intelligence based on enterprise governance policies by monitoring access to, and usage of, SharePoint and its content.</p>

ONE DASHBOARD: COMPREHENSIVE PLATFORM INTELLIGENCE & ACTIONABLE REPORTING

DocAve Report Center is the industry’s most powerful and flexible intelligence toolkit for SharePoint on-premises, cloud, and hybrid deployments. By providing single-pane access to a wide variety of mission-critical analytics, administrators can gain a comprehensive understanding of their platform’s topology, usage, and performance trends, while surfacing content- or user-centric reports for business owners. DocAve’s configurable alerts and notifications, based on customizable threshold triggers, enable administrators and business owners to make proactive, intelligent management decisions.

TECHNICAL OVERVIEW

- Run real-time or scheduled reports to track SharePoint usage, performance, growth, and health
- Track, graphically display, and export reports on platform usage, user activity, and vital analytics – including most frequently accessed content, last access time, active users, searched terms, checked-out documents, download ranking, site activity ranking, site visitors, site activities, failed login attempts, workflow status, and page traffic
- Monitor SharePoint services statuses, network bandwidth usage, CPU and memory consumption, SharePoint topology, site collection comparison and load time – all from a single, customizable interface – and trend this data over time to discern optimal maintenance schedules
- Track trends and growth patterns in storage consumption, SharePoint content databases, web applications, site collections, and SharePoint Online sites—overall and per user
- Configure customizable alerts based on site or content load times, disk space capacity, and CPU usage to proactively address potential performance issues or non-compliant activity in real-time
- Analyze business usage and social activity with holistic auditing to gain insight into the most active and popular contributors, top documents, blog posts, discussions, and wiki pages
- Gain insight into global SharePoint settings, security, metadata, and content type usage, including real-time difference reports to monitor governance policy compliance
- Check the configuration settings for various objects, from farms to lists, in your SharePoint and SharePoint Online environments by granularly selecting specific settings and statistics at different levels to display in a detailed report
- Monitor heavily regulated content and user activities by tracking the item or user through its entire lifecycle, including site or list access as well as permission or content type changes
- Audit all user activities in SharePoint Online, Exchange Online, and Azure Active Directory (AD) through integration with Office 365 Activity Management API
- Display the suspicious user activities, including view, delete, restore, update, search, check in/out, and change settings and permissions, that took place in a given time frame
- Provide an end-user report dashboard allowing site owners and end users to view content usage, user activities, storage analytics, site usage, and activities directly from the SharePoint interface
- Audit all DocAve management actions to monitor administrators for policy compliance

Rule Profile Name	Rule Type	Rule Details	User	Scanned Time	Activity Details	Action
86.39 subsite.offlineuser.permission	Download and Upload	Download Times >= 1 Times within 30 minutes	System Account	2014-12-30 17:16	Download 40 Times within 2014-12-30	Export Details
