

DocAve[®] File Share Navigator 3.0 for Microsoft[®] SharePoint[®] 2013 and SharePoint 2010

Release Notes

Release Date: May 14, 2013

New Features and Enhancements

- Microsoft Windows Server 2012 support
- Microsoft Office SharePoint Server 2013 support
- **Upload when the File Share Navigator service is down** – Files can be uploaded to the File Share Navigator list even when the File Share Navigator service is down.
- **Failover service** – End users can now access files from a Web front-end server even if the File Share Navigator service is down on that Web front-end server.
- **PowerShell support** – End users can now synchronize and view detailed information about configured File Share Links lists using PowerShell commands.

Improvements and Bug Fixes

- When generating synchronization/cache reports, File Share Navigator appends the name of the File Share Links list to the report file name.

Known Issues

- When installing File Share Navigator on a server that is using both .NET Framework 4.5 and .NET Framework 3.5, the status of the **HTTP Activation** feature is also checked.

Workaround: To prevent this issue from occurring, make sure that **HTTP Activation** is installed **before** you install File Share Navigator on a server that is using both .NET Framework 4.5 and .NET Framework 3.5.

- When the **Load metadata from the file system** option is selected, certain PDF properties will not synchronize from the file system to the File Share Navigator list.
- When the **Load permissions from the file system** checkbox option is selected, changing a sub-folder's permissions in the file system will not synchronize those permissions to the File Share Navigator list.

Workaround: Make sure the last modified time of the files or folders is changed each time you want to synchronize the modified security of those files or folders.
