

DocAve[®] File Share Navigator 3

Release Notes

Service Pack 1

Released November 8, 2013

File Share Navigator 3 SP1 Update Details

Refer to the **Updating the Solutions** section of the [File Share Navigator Installation and User Guide](#) for important steps to take before and after your File Share Navigator update.

The following table provides important update details specific to File Share Navigator 3 SP1.

Required Minimum Version for Direct Update	File Share Navigator 2 or later is the required to directly update to File Share Navigator 3 SP1.
Supported SharePoint Version/Patch Levels	SharePoint 2013 or SharePoint 2010.
New License Required?	If you are updating directly from File Share Navigator 2 or File Share Navigator 2 SP1, an updated license is required to run File Share Navigator 3 SP1. Please contact AvePoint Support for an updated license.
IIS Reset Required?	During the update process, IIS is reset on the server where File Share Navigator is being updated.

New Features and Improvements

- Added support for uploading multiple files simultaneously to the **File Share Links** lists.
- Previously, File Share Navigator could only synchronize file permissions from the file system to SharePoint during the first synchronization that occurred after configuring the File Share Links list, or when the files' contents were modified. Version 3.1 now offers a configuration file value (**ForceSyncPermission**) to synchronization all file permissions from the file system to SharePoint.
- Added support for previewing CAD files with .dwg and .dxf extensions without having to install the actual file-viewing tool or open the files in a separate program.
- Added support for Dropbox and Windows Azure Storage as storage types when configuring the File Share Links list.
- Added an optional installation step for users to bulk activate the DocAve File Share Links feature for multiple site collections. If this installation action is selected, the DocAve File Share Links feature is automatically activated on the selected site collections during the installation. If the user does not want to activate the feature on any site collection, this step can be skipped.
- Added support so file downloads via HTTP link can be paused and resumed.
- If you change the preview server when configuring Preview Server Settings in SharePoint (**Central Administration > DocAve File Share Navigator Settings > Preview Service Configuration**), the new preview server will take immediate effect without requiring an IIS restart.
- After uninstalling the File Share Navigator solution or Preview Service, the scheduled job records related to File Share Navigator (stored in **Central Administration > Monitoring > Timer Jobs > Check job status**) are now automatically deleted.

Bug Fixes

- Fixed a bug where buttons on the File Share Navigator list ribbon would not function if the site list's URL included a single quotation mark (').
- The File Share Navigator solution **docave.filesharenavigator.sp2013.solution.wsp** can now be successfully removed from Central Administration in SharePoint 2013.
- If **Load Metadata from File System** is selected in the File Share Links list settings, the last modified time is displayed when you view an item. Previously, the synchronization completed time or the time when the file was copied to the net share location would display.
- Fixed licensing bug issues; a license for File Share Navigator 3 or above is required for File Share Navigator 3 SP1.

Known Issues

- If Apple Safari is used, an error occurs when the user attempts to upload multiple documents in the File Share Links list. The uploading progress displays 100%, but remains unchanged. This problem occurs because Microsoft Silverlight does not currently support Apple Safari.
- Synchronization jobs take longer in SharePoint 2013 environments than in SharePoint 2010 environments due to SharePoint 2013 API limitations.
- Clicking the UNC link in the File Share Links list or the **Download Directly from the File Share** button on the Preview page to upload .dxf files will result in Internet Explorer displaying random letters and numbers.
- The new **Pause** and **Resume** functions are not fully supported with Internet Explorer 9.
