

DocAve[®] Online 3

Release Notes

Service Pack 1

Issued July 2013

New Features and Improvements

- Support for backup and restore of Exchange Online mailboxes.
- Support for selecting Exchange Online mailboxes and associated plans when inviting DocAve Online users and/or AvePoint Support in Account Manager.
- Support for migration, backup, and restore of SharePoint 2013 Online apps.
- Support for the following cloud storage types: Azure, Amazon S3, SkyDrive, Dropbox, Box, and FTP.
- Support for creating site collections in a SharePoint Online tenant.

Known Issues

- When using the scan mode to scan mailboxes in Exchange Online by specifying the user with the **global administrator** role, DocAve Online gives the user permission to view and manage all scanned mailboxes. The user account will see all mailboxes in DocAve Online for management, and as a result, these mailboxes will also load in the local Outlook client. A large number of user mailboxes can cause performance issues if added in bulk.
