

DocAve[®] Online 3

Release Notes

Service Pack 3

Issued January 2014

New Features and Improvements

- Microsoft Exchange Online Backup and Restore and Granular Restore now support restoring e-mails to personal storage table (.pst) files.
***Note:** This feature requires a user-owned and configured storage location. Supported storage locations include: Azure, S3, FTP/SFTP, Box, and SkyDrive.
- Granular Restore supports restoring the granular backup data to a specified storage policy, so users can work on business critical documents even if Office 365 is down.
- DocAve Online Administrator now supports the Policy Enforcer feature to help organizations rapidly respond to unauthorized modifications in features, permissions, and settings. By continuously monitoring and taking action on the Sharepoint Online environment, Policy Enforcer ensures all actions and changes to your environment fall within your organization's defined governance policies.
- DocAve Online now correctly backups and restores list views for Content Manager, Replicator, and Granular Backup and Restore.
- DocAve Online Report Center supports generating configuration reports to display the configuration details and statistics for the selected SharePoint Online site collections, sites, or lists.
- DocAve Online team now sends e-mail alerts to users when data in the Report database exceeds 80% of the defined size and when there is no available space in the database. For more information, refer to Appendix C – Functional Limitations in the [DocAve Online User Guide](#).
- Granular Backup now supports running the incremental backup job in schedule by hour.
- Granular Restore supports restoring the backed up apps to a SharePoint Online site collection in the destination.
- In **Account Manager**, there is a new message to notify users that they can go to User Management (in AvePoint Online Services) to invite, delete, enable, or disable other users. In **My Settings**, there is a new message to notify users that they can go to the Reset Password interface (in AvePoint Online Services) to reset their account password. For more information, refer to Appendix C – Functional Limitations in the [DocAve Online User Guide](#).
- DocAve Online now supports switching to AvePoint Online Services for user and license management
- Deleted lists, folders, documents, items, and item versions will be sent to the recycle bin. However, if a list contains more than 5,000 items, deleting the list will be a permanent deletion.
- DocAve Online 3 SP3 now integrates to AvePoint Online Services (AOS). The inviting, deleting, activating, and deactivating user features are now located in AOS. For more information, refer to the [AvePoint Online Services User Guide](#).

- DocAve Online Report Center supports the Audit Pruning feature to remove the retrieved audit data from the Report database to free up space. For more information, refer to Appendix C – Functional Limitations in the [DocAve Online User Guide](#).
- DocAve Online now sends a notification e-mail to users whose Report Database usage exceeds 80% of the total provided space. For more information, refer to Appendix C – Functional Limitations in the [DocAve Online User Guide](#).
- DocAve Online now supports adding the Job ID in details and uploading attachment during support cases (using the **Invite Support** interface).
- If an end user browse DocAve Online in Japanese, the default language set for the new site collection template is also Japanese when the user creates new site collections using **Administrator > Management > New Site Collection**.
- In the **Submit Feedback** interface, DocAve Online now supports selecting multiple products.

Known Issues

- SkyDrive Pro Quota Data is unsupported in configuration reports. DocAve Online cannot obtain the quota information.
