

## EGOVERNMENT

Embrace the digital age where accessing and sharing information is quick and easy, and can be done from anywhere, where communication is instantaneous, and everything is tracked and analyzed. This is how your citizens live, and it's how they expect everything to work.

## RESPONSIVE GOVERNMENT

With next-day shipping and live-streamed everything, citizens today expect services to be nothing less than fast and efficient. Use technology to your advantage and automate as much as possible. Minimize unnecessary downtime and human error. Maximize citizen satisfaction.

## INTELLIGENT GOVERNMENT

With so much information available with digital tracking of processes, content, and using social listening tools, stay ahead by identifying trends and spotting problems so you can begin addressing them before it compounds to something that affects your citizens.

## OPEN GOVERNMENT

The endless supply of information attainable through search engines and social media has created a culture that is entitled to know and empowered to choose. Leverage the same technology your citizens already use to open up communication. Provide transparency and drive citizen engagement.

# WHAT IS A PROACTIVE GOVERNMENT?

## EGOVERNMENT

Replace cumbersome manual processes and paper shuffling with automation and integration. A digital file stored in a single place can be shared in multiple ways quickly and securely. Tag content with relevant information to retain a full history of activities, protect it in multiple ways to prevent data loss and misuse, and analyze it allow you to understand its impact.

## RESPONSIVE GOVERNMENT

Institute a unified information system where anyone, from anywhere, can log an issue with pertinent documents and photos attached. It is then automatically tagged and routed to the right response teams – replacing traditional call centers laden with manual processes. Tasks can be easily sorted and assigned based on location and up-to-the-minute status, significantly increasing the efficiency of both front-line and field staff.

## INTELLIGENT GOVERNMENT

Take full advantage of the insights that can be gained through digital information that can be tracked, stored, and analyzed. Build analytical tools directly into your information center so that you can identify trends and address problems before they fully develop.

## OPEN GOVERNMENT

Centralize information by stitching together the gathering, analysis, and distribution of data through an integrated communication and management platform. With all of your data in one place, you can gain a fuller understanding of current interests and provide the most relevant information to citizens.
