

Office 365 & Dynamics 365 Backup & Restore

The Ultimate Protection—Automated, Unlimited,
Flexible and Around-the-Clock

Key Benefits

Comprehensive Backup

An unlimited backup service for your customer's Microsoft Office 365 and Dynamics 365 assets—including Microsoft Teams, Groups, Exchange Online, OneDrive for Business and more.

Recover in Minutes, Not Days

No need to hold for support, schedule restore windows, or perform a site-level rollback when you can restore their Office 365 content and mailboxes across Teams, Groups, OneDrive and SharePoint with just a few clicks.

Worry-Free Backup

Run automatic backups up to four times a day and retain 100% of your customer's data for one year. Unlimited backup subscriptions give them the flexibility they need, and the protection they want.

Backup on Their Terms

Choose to securely store your customer's backup data in our scalable Azure Storage with minimal configuration, your private cloud, or whichever data center and vendor you'd like.

The Most Complete Cloud-to-Cloud Backup Solution

Cloud Backup for Microsoft Office 365 and Dynamics 365 offers unparalleled protection for all your customers' tenants. With unlimited, automated backups, speedy content recovery and secure storage in AvePoint's Azure storage or private cloud, all that's left to decide is how much to recover, and when. On-demand and granular, item-level restore provides anytime access to your customers' business-critical emails, files, conversations, projects, and tasks. Plus, with the help of AVA, AvePoint's Virtual Assistant, you'll be able to locate and recover your customers' lost content—from wherever and whenever—with item-level restore.

One platform. Backup all your Office 365 content.

Granular and item level restore capabilities.

Comprehensive Backup

- Near-zero configuration for daily backup plans.
- Backup up to four times a day, every day, to ensure data and content across your customers' Dynamics 365 and Office 365 environments are secure.
- Protection for Office 365 content including: Exchange Online, OneDrive for Business, and more.
- Ultimate Planner, Teams, and Groups protection—beyond mail and files—so your customers' channels, conversations, files, sites, meeting items, tasks, and more are covered.
- Built-in business rules and filters enable you to quickly choose which of your customers' content you want to backup and restore.
- Store their data in the cloud or data center of your choice with support for Microsoft Azure, Amazon S3, Dropbox, and any data destination that's accessible via Secure File Transfer Protocol (SFTP) and File Transfer Protocol (FTP).
- Further safeguard their data from cyberattacks or leakage by bringing your own Microsoft Azure Key Vault Encryption Key to meet compliance regulations around sensitive data.

Granular Restore

- On-demand, granular recovery of your customers' content—including mailboxes, conversations, projects, tasks, calendars, files—to the online or offline storage of choice while maintaining all metadata and permissions.
- Granular restore doesn't just mean an individual document or version—perform security roll-backs to undo unintended permissions changes.
- Restore content and conversations to mailboxes, OneDrive—not just to its original home.
- Export and restore content outside of Office 365, including the ability to restore mail items to a PST, or documents to a file share.
- Quickly recover content with time- or object-based restores by locating business-critical files or emails with full-text search capability for rapid discovery.
- Delegate restores to lower-level administrators and power users in Cloud Backup by any Office 365 scope.
- AVA, AvePoint's Virtual Assistant, is a chatbot that helps locate your customers' lost content by responding directly to Teams chats to find misplaced files or emails, and then easily restore.
