CONTENT SHIELD

Protect. Manage. Proactively enforce information governance policies to tag, quarantine, or remove inappropriate or non-compliant content from Microsoft® SharePoint® 2010.

KEY BENEFITS

- Enhance information governance policy enforcement for content classification and management by automatically tagging SharePoint content based on pre-configured or customized dictionaries

- Protect SharePoint from inappropriate or non-compliant content – including personal, profane, or discriminatory content – with configurable quarantine and removal

- Proactively monitor compliance with comprehensive risk assessment reports and email notification upon identifying inappropriate or non-compliant content residing in SharePoint or connected file shares

- Implement and enforce governance and compliance policies in ordinance with stringent regulations – such as the Health Insurance Portability and Accountability Act (HIPAA) – for sensitive content, including personally identifiable information (PII)

Proactively enforce information governance for Microsoft® SharePoint®

ENSURE COMPLIANCE OF ALL CONTENT UPLOADED INTO SHAREPOINT

DocAve Content Shield helps automate the enforcement of information governance policies for tagging and classifying sensitive content to ensure regulated content is subject to appropriate storage, security, and management policies. Content Shield quarantines non-compliant or inappropriate content – such as PII or profane and discriminatory content – based on customizable keyword dictionaries, phrases, and patterns, facilitating proactive compliance for Windows SharePoint Services – Version 3, Microsoft Office SharePoint Server 2007, or SharePoint 2010.

TECHNICAL OVERVIEW

- Configure multiple, fully customizable dictionaries based on keywords, phrases, numbers, and patterns to scan against SharePoint content and file shares connected with DocAve Connector

- Conduct a comprehensive assessment of SharePoint's risk of non-compliance to identify sensitive or inappropriate content by scanning content against configured dictionaries

- Scan SharePoint content and connected file shares against pre-configured dictionaries for PII to more easily comply with HIPAA and HITECH regulations

- Proactively monitor SharePoint for inappropriate or non-compliant content by conducting real-time scans of all content upon upload as well as scheduled scans of connected content and content already residing in SharePoint

- Prevent uncompressed video files, executables, and other undesired formats from residing on SharePoint by scanning against content and file type dictionaries

- Ensure global SharePoint environments remain fully protected from non-compliant content, and enforce tagging policies for sensitive or regulated content with multi-language support (Unicode)

- Prevent spillage and other forms of environment contamination by tagging, quarantining, or removing content from SharePoint upon identification of sensitive or inappropriate content

- Apply digital signatures to override wrongfully quarantined content

- Enable compliance teams to act quickly upon identification of sensitive or non-compliant content with instant email notifications and user-friendly reports

- Access and browse all quarantined content to approve or reject for SharePoint repositories via SharePoint's Central Administration interface, regardless of quarantine location

- Fully integrated into SharePoint Central Administration for efficient and centralized management
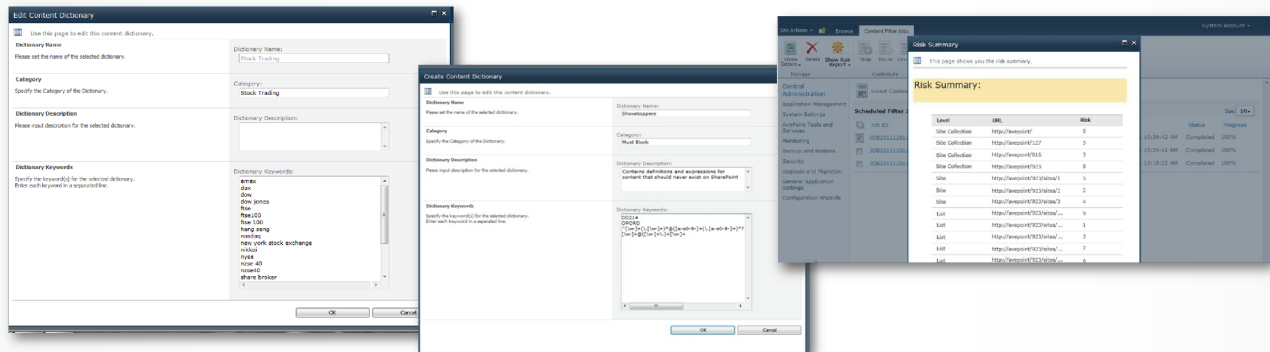

Create a customized dictionary of phrases, keywords, and number patterns to keep your platform compliant.

With DocAve Content Shield, organizations can establish a culture of proactive, preventative, and automated compliance for their SharePoint deployments. As with all AvePoint products, DocAve Content Shield utilizes only fully supported Microsoft methodologies and APIs.
