AvePoint®

Elements Portal for Partners

for Microsoft 365, Dynamics 365, Salesforce and Google Workspace Managed Service Providers

Accelerate cloud adoption and usage by delivering comprehensive coverage for Microsoft 365 with enterprise grade software in addition to data protection for Google Workspace, Dynamics 365, and Salesforce. Elements, AvePoint's partner-centric portal allows you to streamline operational efficiencies. Easily provision, manage, and analyze your customer licenses and usage all in one place. Provision at scale without losing visibility into support tickets and ongoing activity.
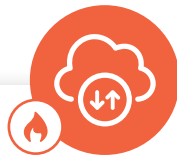

Elements is built on AvePoint Online Services, a 100 percent Microsoft Azure-hosted Software-as-a-Service (SaaS) platform that helps companies take advantage of Microsoft 365's benefits – without compromising control. AvePoint Online Services is trusted by over 8 million cloud users, allowing business users, decision makers, and IT administrators to migrate, backup, and manage collaboration workspaces and CRM data.

SECURE SOLUTIONS UNDER ONE ROOF

Access Monitoring & Control

Secure and monitor sensitive business information, so data and business plans are not vulnerable and exposed.

Backup and Disaster Recovery

Comprehensive coverage of content, permissions, and settings, to ensure protection against data loss or ransomware attacks.

Provisioning & Management

Efficiently provision and manage environments with automated security control. Report on and control license allocation and budgets.
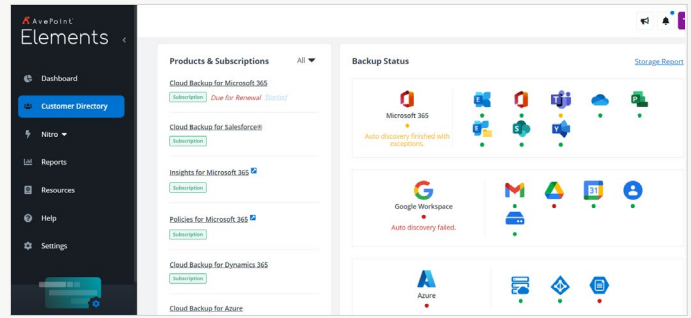

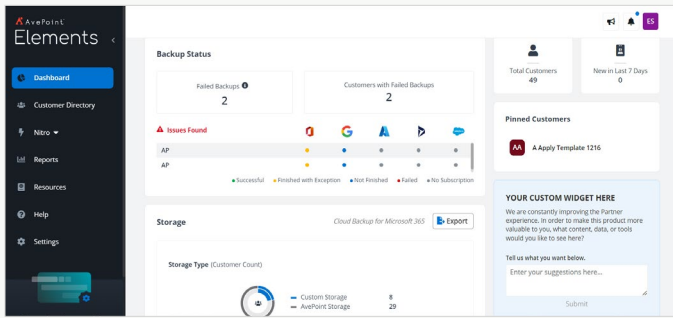

Secure Migration

Fast, secure migration of content from legacy dark and unsecure collaboration systems to a secured collaboration cloud.

" **No other solution gives us the capability to operate these kinds of managed services on behalf of our clients."**

David Huseonica, President and CEO, Cloud|AG

Technical Overview

◉ Monitor, Configure, Manage, and Report

- Report, monitor, and manage the backup status, license information, storage condition, collaboration risk, policies violation, and workspace analysis of all your customers' environments through a centralized modern dashboard.

- Add more value for more of your customers with Risk Assessment to surface workspace indicators across each customer tenant.

- Control Microsoft 365 permissions, external sharing, configurations, and content with automated policy enforcement

- Meet backup and restore SLAs for critical Microsoft 365, Dynamics 365, Salesforce, and Google Workspace services with on-demand backup and granular restore

- Prioritize risky issues of sensitive content, over-exposure, and oversharing with tenant-wide reports

- Set policies based on company guidelines and oversee violations to ensure ongoing enforcement

- Understand the overall risk and compliance posture, implement standard policy rules, set actions and remediate with Elements Risk Management Package

- Gain valuable insights of Microsoft 365 licenses allocation to better control license costs and maximize ROI

- Aggregate audit reports to track all actions taken across customers, users, and AvePoint products

⦿ Simplify and Scale Customer Management through Elements Portal

- Simplify and scale customer onboarding with built-in monitoring, provisioning and templatizing capabilities provided by Nitro

- View, invite, and manage your customers, even activate services with 2-step setup

- Tag and organize your customers for simplified billing and policy management

- Oversee and manage your customers' environment without logging into the product

- Quickly gain insight into open support tickets, job status, and requests

- Incident management alerts you according to configured threshold limits for skipped items or job errors

- Centrally manage and view customer licensing, even manage customer billing profiles

* FLY migration capabilities are bundled with management and protection SaaS solutions, however are available through FLY Server, which must be installed on Azure or your local VM or desktop.

> **"Utilizing cloud-based collaboration technologies such as Microsoft 365 and ServicePoint365 managed by AvePoint Online Services allows us to access data more reliably and work more efficiently than ever before, which ultimately benefits our customers."**
