AvePoint Cloud Backup
For Office 365

Office 365 Backup & Restore
Enhance Your Managed Services with AvePoint Cloud Backup

Protect your customers' Office 365 content no matter where it lives—all from one service.

Key Benefits

Comprehensive Backup, Simple Management

A single backup service for your Office 365 clients and their business needs, including SharePoint Online, Exchange Online, Project Online, OneDrive for Business, Groups, Teams, and Public Folders. With proactive backup coverage and monitoring through a single management console, we'll ensure all customer data remains protected.

Recover in Minutes, Not Days, to Meet Aggressive SLAs

No need to pick up the phone, schedule restore windows, or risk over-writing valuable content with site-level rollbacks. We'll search across backup sets to quickly locate and restore your clients' Office 365 artifacts for sites, libraries, OneDrive, Public Folders, mailboxes, Groups, or Teams.

Worry-free Backup

We run automatic backups up to four times a day and retain 100% of the data for one year, included in the cost of subscription. Supplement your managed services with confidence, and then pass it on to your customers.

Backup on Your Clients' Terms

Work with your clients to determine the best location for Office 365 backup data retention—whether it's in our scalable Azure Storage, their private cloud, or in a data center from the cloud vendor of their choice.

Complete Cloud-to-Cloud Backup, as a Service

AvePoint Cloud Backup is the industry's most complete cloud-to-cloud backup solution for Office 365. With AvePoint, enhance your managed service offerings by providing your customers with automated, unlimited backups and granular, item-level restoration capabilities for business-critical emails, files, conversations, projects, tasks, Groups, Teams, and sites. Give your customers the freedom to choose where data is stored and how much content to restore while meeting specific recovery timeframes with your enhanced managed services portfolio.
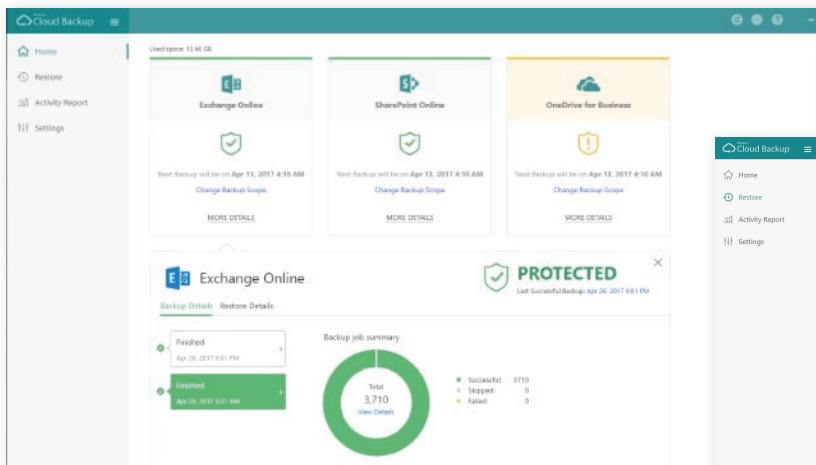

Comprehensive Backup

- Almost no configuration required for daily backup plans.
- Conduct up to four backups per day.
- Protection for Office 365 content, including Exchange Online, SharePoint Online, Project Online, OneDrive for Business, Groups, Teams, and Public Folders.
- Built-in business rules and filters let your customers quickly choose which content they want to restore.
- With Cloud Backup, choose either one year of Azure Storage (up to 3GB/user), or store data with the cloud vendor of your choice. If requirements change, simply contact Support to switch storage locations.
- With Unlimited Cloud Backup, securely store Office 365 backup data in our unlimited Azure Storage—and leave the capacity planning to us!
- View and manage the protection status of all Office 365 assets through a single reporting interface.
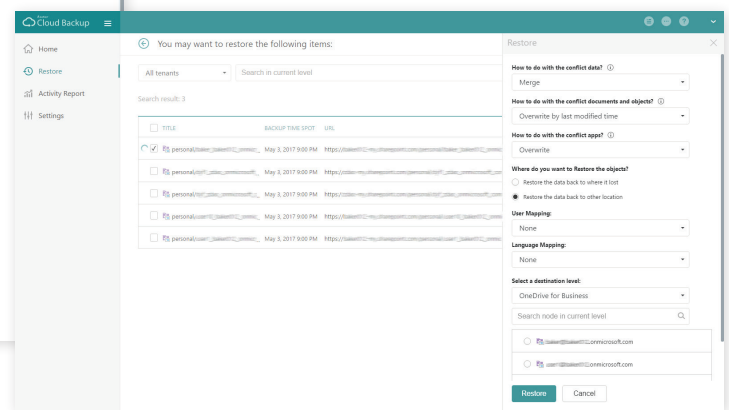

Granular Restore

- On-demand, granular recovery of Office 365 content—including mailboxes, conversations, projects, tasks, calendars, files, Groups, and Teams—to the online or offline storage location of your choice while maintaining all metadata and permissions.
- Granular restore doesn't just mean an individual document or version—perform security roll-backs to undo unintended permissions changes.
- Restore content and conversations to mailboxes, Groups, or sites—not just to their original location.
- Export and restore content outside of Office 365, including the ability to restore mail items to a PST or documents to a file share.
- Recover quickly with time-based restores using a simple and intuitive calendar interface, or search for business-critical files or emails using full-text search for rapid discovery.

One Platform. Backup All Your Office 365 Content

Granular and Item Level Restore Capabilities
