TECHNICAL OVERVIEW

COMPREHENSIVE BACKUP

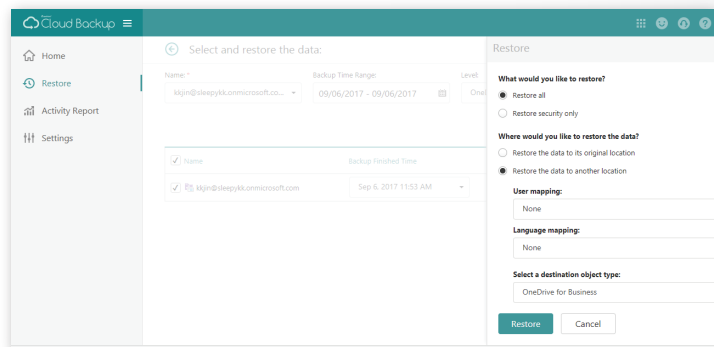

- Near-zero configuration for daily backup plans.
- Target protection is up to 4 backups per day (or every 6 hours*).
- Protection for Office 365 content including: Exchange Online, SharePoint Online, Project Online, OneDrive for Business, Office 365 Groups and Public Folders.
- Built-in business rules and filters enable you to quickly choose which content you want to restore.
- Store backups in our scalable Azure Storage with minimal configuration.
- Store backups in your cloud or data center of choice with support for Microsoft Azure, Amazon S3, Dropbox, and any data destination accessible via Secure File Transfer Protocol (SFTP) and File Transfer Protocol (FTP).
- View and manage the protection status of all Office 365 assets through a single reporting interface.

GRANULAR RESTORE

- On-demand, granular recovery of Office 365 content – including mailboxes, conversations, projects, tasks, calendars, files, and Groups – to the online or offline storage of your choice while maintaining all metadata and permissions.
- Extend the capability to not only restore all content in Office 365 objects, but also enable the specific recovery of security settings a reality for easier rollback of changes.
- Restore content and conversations to mailboxes, Public Folders, Groups, or sites – not just its original home.
- Restore content directly to file systems or export mail conversations as a Personal Storage Table (.pst) file.
- Recover quickly with time- or object-based restores by locating business-critical files or emails with full-text search capability for rapid discovery.

One Platform. Backup All Your Office 365 Content

Granular and Item Level Restore Capabilities
