

COMPLIANCE SOLUTION

DATA LOSS PREVENTION AND GOVERNANCE, RISK AND COMPLIANCE MANAGEMENT

SAY IT

Automatically identify and assess compliance and information governance violations with scheduled and on-demand scans to check against privacy, security, or accessibility regulations and guidelines.

Gain insight into the risk level of data across your collaboration spaces and information gateways to understand where you are most vulnerable with our intuitive dashboard.

Involve human review in the process of risk assessment, allowing compliance officers to validate automated analysis and recalculate compliance reports in order to reduce false positives before they become an issue.

DO IT

Monitor and enforce compliance policies across all enterprise platforms.

Protect regulated and sensitive data from harmful leak or misuse with scheduled and real-time context-aware classification and action.

Automate responses with our Incident Management System to ensure discovered issues are reviewed, tracked, and acted on in accordance with your information governance policies.

PROVE IT

Ensure appropriate controls are in place for your sensitive data with ongoing incident tracking and reporting.

Compliance scanning and action trend reports in addition to historical analysis allow you to measure and report on your organizations' compliance improvement over time.

Quickly and easily describe your controls, processes and progress on enforcing policy compliance and protecting data to business users, regulators and auditors with exportable reports.
