

# FLY

Swiftly consolidate and migrate your on-premises or cloud email into **Office 365**

## Email Migration with Fly

Resolve Your Migration Situation in Three Easy Steps

**STEP 1**  
**Analyze**

**STEP 2**  
**Migrate**

**STEP 3**  
**Monitor**

Gain insight to improve migration project planning. Find out what's important, or just collecting dust. Understand your existing architecture to avoid potential risks or pitfalls. See which mailboxes need to be discarded, re-worked, or migrated as-is.

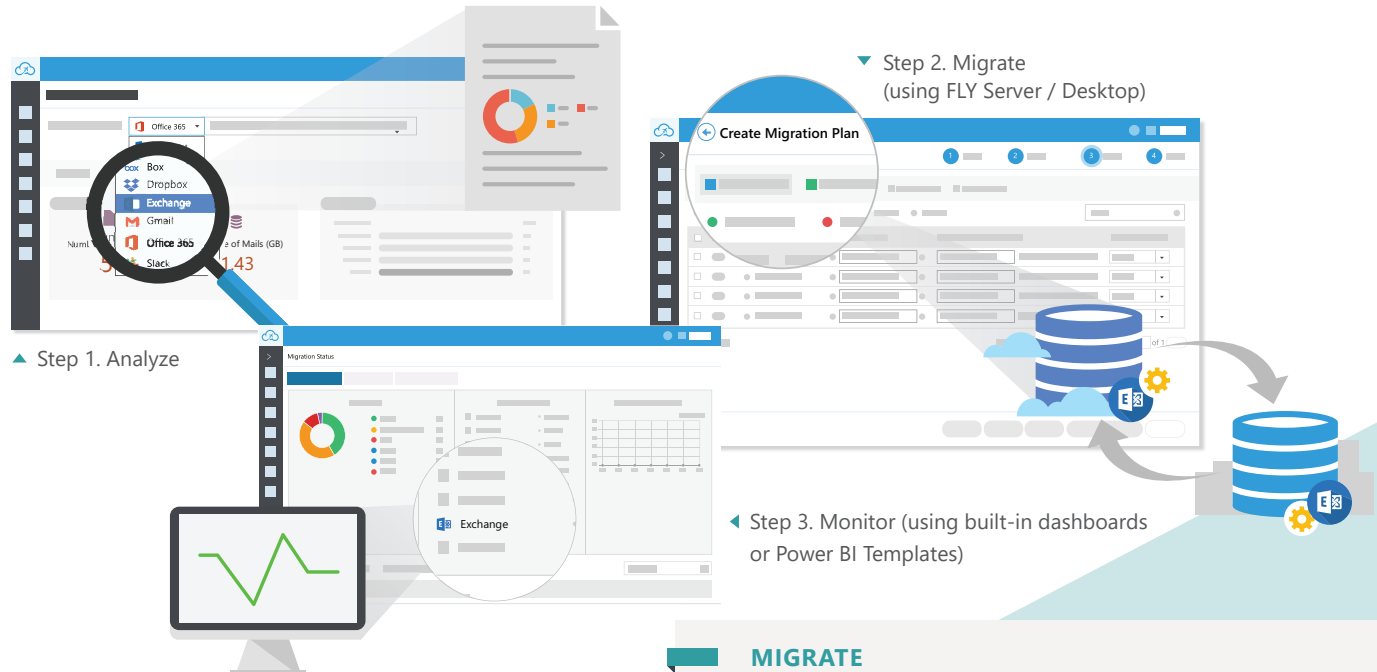

Move Exchange, Gmail, IMAP/POP3 mailboxes and PST files to achieve your desired end goal with drag-and-drop ease. Then map, filter, and schedule the move, or just migrate in real time. Our Wizard guides you with helpful tips to make getting started a breeze.

Track migration progress and status with dynamic dashboards and detailed insights to validate your migration, generate reports that highlight actions taken, and always be in the know with automated updates sent directly to stakeholders.

### Email Migration with FLY

FLY is one of the fastest tools on the market to consolidate and migrate on-premises or cloud-hosted mailboxes in Exchange, Gmail, or IMAP/POP3 formats into your Office 365 cloud. Migrate your mailboxes as-is, or transform them into Office 365 Group mailboxes to take advantage of what Office 365 has to offer, faster. If you're looking to clean up or clean out data, are on a tight timeline, or an even tighter budget, FLY can help. With our super-light install package, you'll be ready for takeoff in a jiffy!!

## PRE-MIGRATION ANALYSIS

- **Know your mail.** Scan and identify the number and size of mailboxes that require updating, mapping, or deleting.
- **Get all the details.** Generate detailed reports for your pre-migration analysis, export data to CSV files for deeper analysis.
- **Create a plan.** Create migration plans or a Plan Group in which multiple plans can be added according to your project timetables – define the scope, filter policy, method, and schedule. Plans can be reused in the future.

## MONITOR

- **Track progress.** Monitor migration status and progress on the built-in dashboard, or by setting up a SQL connection to leverage our migration database. Create dynamic reports for throttling, performance, migration progress, and more with our PowerBI templates!
- **Validate the migration.** Report on migrated data volumes and understand migration trends across sources and destinations.
- **Exec-level analysis.** Download or email executive reports on job count and status, mailbox count and status, and migration trend analysis to highlight the actions taken during the migration.

## MIGRATE

- **Drag-and-drop mode.** Move mailboxes, users, groups and resources from Exchange on-premises, Exchange Online, Gmail, other mailboxes supporting IMAP/POP3, and PST files into Office 365 with drag-and-drop ease. Or, pull Exchange Online mailboxes back on-prem if your cloud plans change.
- **Tenant-to-tenant migration.** Migrate mail, associated public folders, and auto-complete lists between mailboxes in different Office 365 tenants. Automatic provisioning of Exchange Online mailboxes by assigning Office 365 licenses to destination end users reduces manual efforts.
- **Convert mailboxes to take advantage of Office 365 faster.** Transform existing mailboxes into User, Shared, Group, or other Mailbox Type.
- **Take only what you need.** Filter based on content properties to take only what's relevant and leave behind content that's stale or no longer necessary. Full and incremental migration options capture changes as you go, even email deletions.
- **Migrate on your time.** Set up a schedule or migrate in real time.
- **Resume or rerun failed or stopped jobs.** Pick up the job from where it stopped or failed, or rerun jobs to correct failed files or items.
- **Automatic Outlook configuration.** FLY Assist ensures users' local Outlook is seamlessly reconfigured to your new Exchange Online mailbox. FLY Assist can be installed automatically by admins or sent to end users to guide them through the final steps.
