AvePoint Cloud Backup for Dynamics 365 May 2018

Release Date: May 20, 2018

New Features and Improvements

- AvePoint Cloud Backup for Dynamics 365 will integrate the timeout session settings that users configure in AvePoint Online Services.
- Support configuring the layers of the related records to restore. This setting is used to specify a limitation for restoring related records. For example, if Record A is related to Record B and Record B is related to Record C, if you select Record A to restore and set this value to 2, then Record B and Record C will be restored as related records but the records related to Record C will not be restored.
- Support using SFTP as a backup storage location.
- Added the Job Status filter and the Organization filter in the Activity Report.

AvePoint Cloud Backup for Dynamics 365 March 2018

Release Date: March 18, 2018

New Features and Improvements

- In AvePoint Cloud Backup for Dynamics 365, you can now restore field data for records.
- AvePoint Cloud Backup for Dynamics 365 now supports the backup and restore for the records of additional built-in entities such as Channel Access Profile, Channel Access Profile Rule, Channel Access Profile Rule Item, Channel Property, Channel Property Group, E-mail Server Profile, Email Signature, Email Template, Entitlement, Entitlement Template, Mail Merge Template, Personal Document Template, Rating Model, Rating Value and Theme.

AvePoint Cloud Backup for Dynamics 365 January 2018

Release Date: January 21, 2018

New Features and Improvements

- In AvePoint Cloud Backup for Dynamics 365, you can now update the backup job frequency and schedule for each organization after you start the backup service.
- AvePoint Cloud Backup for Dynamics 365 now supports restoring data at entity level.

Bug Fixes

- If you select the Opportunity entity and the Opportunity Close entity to restore with Do not **restore related records** selected, some of the Opportunity Close records may fail in the restore job.

Root Cause: AvePoint Cloud Backup for Dynamics 365 restore job cannot control the restore order for the entities that have a parent-child relationship.

Workaround: To successfully restore the Opportunity and Opportunity Close records, select the Opportunity entity to restore with the **Restore the related records** option selected.

AvePoint Cloud Backup for Dynamics 365 December 2017

Released: December 17, 2017

New Features and Improvements

- Dynamics 365 Backup supports storing backup data and attachments to your own storage location. To use your own storage location, contact AvePoint to purchase the corresponding license and for support.
- Before you restore a Dynamics 365 record, you can click the **Compare** button to view this record's **Backup Value** (backup data of this record) and **Current Value** (record data in Dynamics 365) for comparison. You can also select the **Only show differences** option to only view the properties whose **Backup Value** and **Current Value** are different.
