AvePoint GroupHub 1.2

Release Date: May 20, 2018

New Features and Improvements

- The **Governance Information** tab has been added to the group information page and the **Group Information** tab has been added to the Cloud Governance page for a group to easily switch between the group information and Cloud Governance information of a group.
- Users with the Administrator role in AvePoint GroupHub can now upload a custom logo.
- Added the following Microsoft Teams related functions to AvePoint GroupHub:
 - Microsoft Teams is now enabled on the GroupHub interface when creating or changing an Office 365 group.
 - You can now navigate directly to Microsoft Teams via the Teams link of a group.
 - You can now filter groups based on whether or not Microsoft Teams is enabled and view which groups are Microsoft Teams enabled via a Teams icon in the group card.
- You can now invite other users in the tenant to a specific Office 365 group.
- Cloud Governance **User Profile Property** metadata can now be configured for a group when changing an Office 365 group by submitting a Cloud Governance service request in AvePoint GroupHub.
- Cloud Governance **Managed Metadata** metadata can now be configured for a group when changing an Office 365 group by submitting a Cloud Governance service request in AvePoint GroupHub.
- Cloud Governance **User Profile Property** metadata can now be configured for a group when creating an Office 365 group by submitting a Cloud Governance service request in AvePoint GroupHub.
- You can now enable Microsoft Teams for an Office 365 group when creating or changing the group.
- The group name and group ID can be constructed based on the rules configured in the selected Cloud Governance service when creating an Office 365 group by submitting a Cloud Governance Create Group service request.
- Dynamic group membership rules can now be configured to populate group members for a group when creating an Office 365 group by submitting a Cloud Governance Create Group service request.

- Cloud Governance **Managed Metadata** metadata can now be configured for a group when creating an Office 365 group by submitting a Cloud Governance service request in AvePoint GroupHub.
- The Cloud Governance **Yes/No (check box)** metadata can now be configured for a group when creating or changing an Office 365 group by submitting a Cloud Governance service request in AvePoint GroupHub.
- Primary contact and/or secondary contact roles can now be manually entered as the group member/owner when creating an Office 365 group by submitting a Cloud Governance service request.

Bug Fixes

The Governance Automation Online Create Group services where the **Available in service catalog (the Start a Request page)** option is deselected will not be displayed in the service list and unavailable to be selected for creating a group in AvePoint GroupHub.

AvePoint GroupHub 1.1

Release Date: September 25, 2017

New Features and Improvements

- You can now change group information by submitting a Governance Automation Online Change Group service request in AvePoint GroupHub.
- You can now create a group by submitting a Governance Automation Online Create Group service request in AvePoint GroupHub.
- AvePoint GroupHub Administrators can now configure **Governance Automation Online Integration Settings**.
- Office 365 group's Governance Automation Online (GAO) metadata can now be displayed as GAO tags of the group in AvePoint GroupHub.
- Office 365 group settings can now be configured in AvePoint GroupHub.
- You can now add tags to Office 365 groups outside AvePoint GroupHub using APIs and display the tags as Admin tags in AvePoint GroupHub.
- You can now view Governance Automation Online related information of an Office 365 group by clicking the **Governance Automation Online Information** button in the group card.
- Users can automatically log into Governance Automation Online to view requests when they click the **My Requests** link in AvePoint GroupHub.
- AvePoint GroupHub Administrators can configure whether or not to allow users to create Office 365 groups by configuring AvePoint GroupHub setting.
- AvePoint GroupHub Administrators can enable or disable the Governance Automation Online features in AvePoint GroupHub.
- Users can display Governance Automation Online related information (Basic Properties, Metadata, Policy, Lifecycle Timeline, and Service) of an Office 365 group.
- Users can now configure classifications for Office 365 groups in Group Settings.

Known Issues

- The Governance Automation Online Create Group services where the **Available in service catalog (the Start a Request page)** option is deselected are still displayed in the service list and able to be selected for creating a group in AvePoint GroupHub.

When you create an Office 365 group by submitting a Governance Automation Online Create Group service request in AvePoint GroupHub, and the request can be approved by the approver, the created group is not displayed in AvePoint GroupHub.

Root Cause: The groups that are created via Governance Automation Online can be displayed in AvePoint GroupHub only when the groups are synchronized.

Workaround: The synchronization job runs every hour after enabling group creation via Governance Automation Online in the **Governance Automation Online Integration Settings**.
