

AvePoint Privacy Impact Assessment 1

Release Notes

Cumulative Update 2

Issued July 2014

New Features and Improvements

- User can configure the e-mail message body through configuring the HTML in **Text Mode**.
- If AvePoint Privacy Impact Assessment is up to date, a message will prompt the user that the product is already in the newest version when using the **Update Tool**.
- Support Responsive User Interface.
- New install mode allows users to install without configuring the installation settings.
- Added the ability to have questions answered in parallel.
- Added risk values based on answers, and the ability to calculate risk score for each project instance.
- Added the ability to upload attachments when answering or reviewing questions.
- Added support for sequential and parallel question orders in question collections, and added the ability to have questions answered in parallel.
- Implemented the functionalities of the APIA update tool for updating AvePoint Privacy Impact Assessment to a newer version.
- Added the ability to change the user's login name to the user's display name in the exported report.
- Users can now configure file types that are restricted to upload to the **AvePoint Privacy Impact Assessment > My Tasks > Answer Question** interface or Review Question interface as attachments by modifying the **APIASetting.config** file.

Known Issues

- Users cannot change the IIS website if an APIA project is currently running. If a user needs to change the website, use the AvePoint Privacy Impact Assessment Configuration Tool to assign the desired IIS website, save the project as a new project, and then run the project.
- If a user installed AvePoint Privacy Impact Assessment with a built-in database, a SQL Server instance is also created. If the user later uninstalls the product, the built-in database and SQL Server instance are not uninstalled and must be removed separately.
