AvePoint Risk Intelligence System 2.2.0

Release Notes

Release Date: May 2018

New Features and Improvements

- The company name displayed on the **Data Map** page can now be customized.

- You can now define a prefix for the Inventory Record ID and Recommendation ID.

- You can now delete assessments in an inventory record when editing the inventory record.

- A recommendation for questions can now be started when reviewing the answers to these questions in the assessment.

- When installing AvePoint Risk Intelligence System Support, you can now choose to create a new application pool or use an existing application pool.

- Custom columns can now be added to the **Inventory Record Information** page and different custom column types can also be defined when adding them.

- You can now view reports in different graphs based on different conditions to gain a comprehensive understanding of the inventory records, assessments, and recommendations in your environment.

- Questions downloaded from AvePoint Privacy Impact Assessment 1.2 can now be converted so that they can be imported into AvePoint Risk Intelligence System.

- You can now define if a question must be answered by selecting or deselecting **Responder must answer this question** when adding the question.

- Apps that can be used to access AvePoint Risk Intelligence System can now be created through the API.

- You can now add notes to an assessment to provide additional information when reviewing answers in the assessment.

- Added the risk matrix to AvePoint Risk Intelligence System. You can now define the risk score and risk level for a question by selecting a severity and likelihood from the risk matrix.

- Inventory records can now be exported to Word files and Excel files and inventory records can now be imported to AvePoint Risk Intelligence System through a ZIP file compressed from CSV files or Excel files.

- You can now change the risk score and risk level of questions in the assessment whose **Risk Calculation Method** is **Use the highest risk value**.

- Added the **Risk Trend** report to support displaying the risk trend of the inventory records that have been updated within a configured date range; added the **Record Quantity Calculated** report to support displaying the inventory records' quantity calculated by different criteria.
