

DocAve® 6 Software Platform Service Pack 1 Cumulative Update 1

Release Notes

For Microsoft SharePoint
Release Date: November 6, 2012

Bug Fixes

- License validation logic updated to ignore e-mail servers attached to a SharePoint farm.

Known Issues

- If installing a hotfix that contains one or more solution files, an IIS application pool restart will occur on the Web applications that contain those solution files.
- The SP2010DocumentAuditing solution falsely displays *Not Deployed* as its status in Solution Manager after upgrading from DocAve Service Pack 1. Retract the solution in SharePoint then redeploy to update the status.
- Updating from DocAve 6 General Availability results in license validation error.
