

# **DocAve<sup>®</sup> File Share Navigator 2.0 for Microsoft<sup>®</sup> SharePoint<sup>®</sup> 2010 and SharePoint 2007**

## **Release Notes**

**Release Date: June 5, 2012**

# Introducing File Share Navigator

DocAve File Share Navigator is AvePoint's newest product for quickly retrieving and accessing file share content through SharePoint lists without the need for migration. [Click here to read the press release.](#)

## Known Issues

- In a SharePoint 2010 environment with UAC (User Account Control) enabled, the DocAve File Share Navigator Service does not successfully install. The service can be manually installed through the Command Prompt interface while using the **Run as administrator** option.
- An issue occurs after customizing the property value of a non-Office file under the file share path, choosing to **Load metadata** from the **Settings** page of the corresponding File Share Links list, and then performing a synchronization job. Upon job completion, the file is synchronized to SharePoint successfully, but the customized property value is not.
- An issue occurs after creating a File Share Link list and choosing to **Load permissions** from the file system in the **Settings** page, then modifying the permission of an existing subfolder under the file share path and performing a synchronization job. Upon job completion, the permission changes to the subfolder are not synchronized to the File Share Link list.
