

# DocAve<sup>®</sup> Governance Automation Online

## Release Notes

Service Pack 1

Issued July 2014

# New Features and Improvements

Governance Automation Online Service Pack 1 is the first publicly available release of this product.

## Known Issues

- When configuring the Quick Start Wizard for the first time, Governance Automation Online will register all of the site collections within the provided SharePoint Online admin center to DocAve Online. If those site collections were not already registered to DocAve Online, registration may go on for longer than expected. For example, registering 200 site collections takes about 30 minutes.
- Questionnaires cannot be configured using Internet Explorer 8.
- Due to a SharePoint Online API limitation, Governance Automation Online retrieves the site collection **Last Modified Time** as the **Last Accessed Time**.
- If you create a custom library template in SharePoint Online with **Include content** selected and then create a Library/List service for this custom library in Governance Automation Online, approving a **Create List/Library** request will create a library without content. This is due to a SharePoint Online API limitation.
- In the Create Site service, site collection URLs that contain **-public** in the Template store field will not be checked as valid. This is due to a SharePoint Online API limitation.
