

# **File Share Navigator Online 1**

## **Release Notes**

**Service Pack 3**

**Release Date: October 2015**

## New Features and Improvements

- Improved the synchronization performance of the File Share Navigator Online lists.

## Known Issues

- A File Share Navigator Online list cannot be created under a site collection that is created automatically by SharePoint Online. This is due to the setting **Allow users to run custom script on self-service created sites** being set to disabled by default. You may apply the following workaround to bypass this setting: Click the app launcher icon in the upper-left corner in SharePoint Online and select the **Admin** tile. The **Office 365 admin center** appears. In the lower-left navigation, expand **Admin** to select **SharePoint** to open the **SharePoint admin center**. On the **SharePoint admin center** page, under **Custom Script**, select **Allow users to run custom script on self-service created sites** and click **OK** to enable this setting. The setting will take effect in 24 hours, and the File Share Navigator Online list can then be created under the default site collection.
