

# **DocAve Software Platform**

**v5.8.0.0**

## **Release Notes**

For Microsoft SharePoint

Release Date: June 12, 2012

# New Features and Improvements

## Administrator

- A downloadable report is now available after running the Dead Account Cleaner.

## Archiver

- Archiver Restore Controller now supports up to 100 items per page.

## Connector

- Added workaround to the 256 URL character limitations set by SharePoint so that file and folder names can be retained.
- Added granular control over what metadata to be loaded/synchronized from the file share resulting in shorter initial loading times and a more customized set of metadata is displayed in SharePoint.

## Content Manager

- Added list and site template mappings.

## Replicator

- Expanded DocAve Replicator filters to support replication based on Content Type ID and Name.
- Supports replication of content name changes only to has been added to avoid additional files.
- Added support for post replication plan creation permissions inheritance.

## Migrator

- Improved support for Nintex Workflow when migrating from SharePoint 2007 to SharePoint 2010 with the ability to migrate History and Task List.
- For SharePoint 2007 to SharePoint 2010 Migration, batch plan configuration in CSV or XLS format is now supported.

## Patch Manager

- Improved notification during upgrade to avoid issues with environments with CIs. Contact AvePoint support for consultation prior to upgrading if hotfixes have been applied.

## Log Manager

- WASCE web service has been updated to Apache Tomcat v7.0.25. As always, DocAve fully installs, updates and manages any platform dependencies.

# Bug Fixes

## Archiver

- Archiving rule by access time is now properly ignoring activity from service accounts or crawlers.

## Auditor

- The retrievable size for IIS log files has been increased to allow for larger data sets.

## Connector

- Thumbnails for TIF files are now properly displayed.
- Changing the name of a file in the file share no longer appears as a new file in SharePoint.

## Content Manager

- User Profile data are now properly moved/copied.
- InfoPath content can now be properly copied.
- Visio Web Access Web Part can now properly display Web Drawing after being copied/moved.

## Content Manager and SharePoint 2007 to SharePoint 2010 Migration

- The *Title* field metadata for the native Announcements list is now properly being copied to a SharePoint 2010 destination environment.

## Control Panel

- Data pruning now actively removes expired data from TSM devices.

## Replicator

- Hidden navigation items are now properly replicated.
- Web parts extended into multiple zones now replicate properly.
- Web applications with Alternate Access Mapping in place now replicate properly.

# Known Issues

## General

- Internet Explorer browser cache must be cleared after upgrading to DocAve 5.8.0.0. To do so, with your Internet Explorer window open: Press **F12** on your keyboard to access the developer tools > Click **Cache** > Select **Clear browser cache...** > Click **Yes** in the confirmation window.

## Replicator

- Renaming a source folder in a Japanese environment is causing a new folder to appear in the destination.
