

AvePoint's Solutions for Office 365 Education

Microsoft® Office 365™ Education provides you with powerful communications and productivity tools flexible enough to meet the needs of your students, faculty, and staff. As Office 365 becomes a more ingrained part of how your students and teachers communicate over assignments and projects – and even how your staff members manage student records and events – your information architecture can begin to deteriorate as you accommodate increased demand for new and ad hoc workspaces. If it becomes difficult for students, faculty, or staff to find information, they are less likely to want to use the technology you provide.

AvePoint's solutions for Office 365 Education promote student and faculty collaboration with intuitive apps as well as improved content publishing and recovery time that can meet the demands of today's fast-paced lifestyles. Unified content and security management helps simplify IT management from hectic enrollment periods through graduation, and enhance security and compliance by standardizing organizational policies for content provisioning and access control.

DocAve Online for Office 365 Education

Provide a reliable collaboration platform that can keep up with the needs of your students and faculty. With DocAve Online, simplified IT management helps maintain control over users, permissions, and content while keeping up with the changing needs of your institution.

- Quickly restore lost or corrupt student records, assignments, discussion boards, and sites
- Easily restructure by moving or copying student records, or even entire class sites, with all configurations and security settings intact to adapt to changes in curriculum
- Maintain structure on your information architecture with tagged and classified content such as student and alumni records, course material, and documents for clubs or events, and reorganize structure as requirements evolve
- Unburden your IT administrators with user-driven publishing, empowering students, faculty, and staff with the ability to easily update documents such as school papers, syllabuses, and as well as online bulletin boards
- Bulk manage class and project sites, and save time and resources ensuring up-to-date student and faculty workspaces
- University-class auditing and reporting capabilities provide complete oversight on all student and alumni records by tracking content access and modification, as well as settings and security
