

Microsoft Teams Intelligent Surge Management

Teams popping up like crazy? Get organized and secure in two weeks.

AvePoint's excited to offer our best in class products + professional services to meet your Microsoft Teams governance demands with ease.

The Side Effects Of Your Microsoft Teams Usage Surge

Microsoft Teams has kept users engaged and productive as they rapidly transition to work from home. For organizations that have yet to deploy the service, leveraging Teams is no longer a question or a goal, it needs to be done as soon as possible.

As all collaboration moves online, organizations have found Teams usage rapidly increasing and are struggling to keep pace with the skyrocketing number of Teams being created each day.

These virtual workspaces all contain critical business data of varying sensitivity levels, and oversight is critical to long-term success. **Ask yourself will you (or do you):**

- Have a firm grasp on why all these Teams are being created?
- Be confident the content being stored and shared within them is appropriate for all Team members?
- Still need all these Teams a year from now?

You risk being overrun by well-meaning collaborators. Sprawl impacts productivity, security and compliance. Bottlenecking online collaboration isn't an option either.

Rapid Teams Deployment with AvePoint

AvePoint has created a turnkey solution for commercial and GCC environment customers that need automated Teams management, fast.

The package includes professional services and predefined policies within our Cloud Governance solution that are designed to meet the most common Teams use cases with built-in best practices.

Following a rapid, two-week deployment, you will be able to:

- Identify clear ownership with primary and secondary Team owners assigned automatically
- Easily classify and inventory Teams to simplify oversight and management
- Enable external guests only for specific classes or types of Teams
- Enforce naming conventions across Teams as they are provisioned
- Apply lifecycle management – including leases, lease renewal, and expiration dates.
- Meet basic retention and audit requirements with Cloud Backup integration

Up to 8 Unique Team Types

- **Private Teams**
 - Operational Team/Confidential Classification/Internal Users Only
 - Operational Team/Normal Classification/Internal Users Only
 - Project Team/Confidential Classification/Internal Users Only
 - Project Team/Normal Classification/Internal Users Only
 - Project Team/Confidential Classification/External Users Allowed
 - Project Team/Normal Classification/External Users Allowed
- **Public Teams**
 - Operational Team/Normal Classification/Internal Users Only
 - Project Team/Normal Classification/Internal Users Only

Lifecycle Management

- Automatically prompts Team owners to validate members on a regular basis and identify inactive Teams for Team Owners to review. Ability to specify a tighter inactivity threshold and more frequent membership review for confidential and external Teams.

Automated Questionnaire

- A Teams-based questionnaire determines the correct Team type at creation based on project duration, content sensitivity, and presence of guest users.

Consistent Policies

- Ensures user actions will not violate the content and security rules of the Team type by configuring workspace rules during provisioning.

Enhanced Ownership

- Gather, verify and maintain accurate ownership and classification of your workspaces. Primary and secondary contact options can be prepopulated.

Reporting & Auditing

- Easily report on a current and complete inventory of Teams workspaces. Audit Team requestors and approvers.

Training

- Access to AvePoint's library of governance videos, user guides, and more.
