Manage. Simplify internal content migration and enterprise restructuring for Microsoft SharePoint Server and SharePoint Online.

SIMPLIFIED CONTENT MANAGEMENT

- **Seamless Content Migration across Hybrid SharePoint Environments** - Seamlessly migrate content and manage hybrid SharePoint environments by copying or moving content, apps, user profiles, workflows, as well as additional features in SharePoint 2016 and Office 365 across on-premises and cloud-based environments.
- **SharePoint Restructure** - Promote or demote sites on-the-fly and copy content – from list to list, library to library, or site to site – according to business requirements across multiple SharePoint environments or content databases.
- **Attach and Merge** - Attach and Merge features, simplify the promotion and demotion of sites or site collections for intuitive content restructuring.
- **Migration Result Preview** - Preview the content migration results including the destination SharePoint structure and the content from the source, before actually running the job.
- **Backup and Rollback** - Back up the source or destination environment before performing a copy or move action, and enable to do rollback to restore the original data.

CONTENT RESTRUCTURE WITH FULL FIDELITY

- **Property Mapping** - Migrate, copy, move, and restructure content – including content externalized by DocAve Connector, DocAve Storage Manager, and DocAve Archiver – within or across different locations, servers, and farms with full fidelity by mapping list names, columns, content types, and templates.
- **Link Converting** - Automatically redirect existing links of moved content to the new location within a site collection.
REDUCED DEPLOYMENT TIME WINDOWS

- Reduced Deployment Time Windows - Easily migrate content across development, staging, and production environments to reduce deployment time windows, improve IT productivity, and populate development environments with sample production content

OPTIMIZED USER EXPERIENCE

- Centralized Management through a Single and Intuitive Interface - Manage SharePoint content within or across all farms through a single, intuitive interface featuring familiar ribbon-based controls and wizards for “step-by-step” guidance
- Comprehensive Report Dashboard - Provide a comprehensive report dashboard to monitor all the content management and restructure jobs
- Job Repair - Receive detailed reports as soon as a job is complete, allowing you to check for and repair content that may have been left over
